## Solutions Consultant · Applied AI · Spanish/English

+31 6 38859519 | franciscorau08@gmail.com | franciscorau.com | linkedin.com/in/francisco-rau | Tilburg, NL

### Summary

---

Analyst-engineer with an MSc in Data Science & Society and a BSc in Economics (Tilburg University). Native Spanish, fluent English. I work with agentic AI tooling as my delivery method and I have built and run two systems end to end: Citania, a multi-tenant booking platform on PostgreSQL with 294 automated tests, and Alpha Scout, a live football player-valuation platform. A year as Data & Process Analyst at Netvice turning operational data into production decision tooling. Explaining a technical decision to the person who has to live with it is the part of the work I want. Everything below is live at franciscorau.com.

### Skills

---

Languages: Spanish (native), English (fluent), Dutch (A2, actively learning)

Applied AI: agentic workflows (Claude Code, Replit), LLM integration, evaluation design, prompt design

Code: Python, TypeScript/JavaScript, React, Node/Express, SQL, PostgreSQL, REST API integration

Delivery: requirements shaping, business translation, production ownership end to end

### Experience

---

#### Data & Process Analyst — Netvice

May 2025 – Aug 2026 · Tilburg, Netherlands

- Built with agentic AI as my delivery method — delivered end to end as a single analyst: design, build, and shipping of production tooling.
- Several of the systems below were ones I proposed myself — need identified, pitched, built, and shipped end to end.
- Progressed from data intern to Data & Process Analyst within the year, moving from reporting work to company-level strategic projects.
- Real-time operations reporting: live dashboards for daily coverage and planning, plus recurring daily reports used by operations.
- Performance analytics: a percentile-based pacing metric designed to stay comparable across workloads with very different volumes and difficulty, combined with outcomes into a single performance index used in operational reporting.
- Forecasting model (the centerpiece): translates planned workload into the staffing required on any future day — a cohort-based simulation that put demand 500+ days ahead, far beyond the scheduling horizon, with bottleneck detection.
- Owned operational BI end to end — from roadmap and data model to reporting used daily by operations.
- Built everything configurable rather than hard-coded, so the tooling keeps working as workloads and staffing change.

#### Student Researcher — Philips

Sep 2022 – Dec 2022 · Eindhoven, Netherlands

- Researched OneBlade market penetration among students; built linear models estimating adoption of a blade-subscription service across student segments.

#### Data Entry — Von der Heide

Jan 2019 – Aug 2019 · Mexico City, Mexico

- Cleaned and migrated the company database to a new CRM system, safeguarding data integrity throughout the transfer.

### Selected Projects

---

#### Market-Gap Analysis: Online-Booking Adoption in Mexico City

2025 · Places API, headless browser, Streamlit

- End-to-end data pipeline measuring online-booking adoption across 10,605 businesses: 722 structured API queries, deduplication, two independent booking detectors, and public-registry enrichment. Measured 6.9% adoption; delivered a 9,878-row qualified dataset (89% with direct contact details) as a workbook and dashboard.

- Weather Prediction-Market Research**

2026 · Python, probability calibration, market microstructure
- Tested whether prediction markets price official weather observations efficiently: implied-probability extraction from order books, no-arbitrage coherence checks, repricing-latency measurement. Documented an honest null result.
- Citania — Booking & Payments Platform**

2025–2026 · TypeScript, PostgreSQL, React Native
- Solo-built multi-tenant booking and payments SaaS: 100+ integration tests, database-level slot exclusivity, two-way Google Calendar sync.
- Football Player Value Modelling**

2024 · Python, statistical modelling
- Predicted market values on a multi-year, multi-competition dataset compiled myself.

**Education**

---

- MSc Data Science & Society (Business Track) — Tilburg University**

2023 – 2024
- BSc Economics — Tilburg University**

2020 – 2023

**Languages**

---

English (native), Spanish (native), Dutch (A2, actively learning)
