Re: Revenue Operations Analyst — Haarlem

Tilburg, 7 September 2026

I applied for the Revenue Operations Analyst role. Revenue ops is the discipline of making the funnel legible - pipeline data that reconciles, definitions that hold, reporting people trust. That was my job at Netvice, where I built operational BI from zero and owned it through daily use.

I work in SQL and Python, build dashboards people actually open, and my portfolio (franciscorau.com) shows production systems, not slides. Available immediately, based in Tilburg.
