

Francisco Rau

Data Engineer · Python · Economics + Data Science

+31 6 38859519 | franciscorau08@gmail.com | franciscorau.com | linkedin.com/in/francisco-rau | Tilburg, NL

Summary

Analyst-engineer with an MSc in Data Science & Society and a BSc in Economics (Tilburg University). Python is my main language for analysis and pipelines, and I have built ETL from APIs into PostgreSQL end to end. A year as Data & Process Analyst at Netvice turning operational data into production decision tooling, plus Alpha Scout, a live player-valuation platform I built and validated myself. Everything below is live at franciscorau.com.

Skills

Code: Python (pandas, scikit-learn), SQL, PostgreSQL, TypeScript/React, Git

Data: ETL and API integration, data modelling, metric design, forecasting, validation design

AI: agentic delivery (Claude Code, Replit), LLM workflows

Languages: Spanish (native), English (fluent), Dutch (A2, actively learning)

Experience

Data & Process Analyst — Netvice

May 2025 – Aug 2026 · Tilburg, Netherlands

- Real-time operations reporting: live dashboards for daily coverage and planning, plus recurring daily reports used by operations.
- Forecasting model (the centerpiece): translates planned workload into the staffing required on any future day — a cohort-based simulation that put demand 500+ days ahead, far beyond the scheduling horizon, with bottleneck detection.
- Several of the systems below were ones I proposed myself — need identified, pitched, built, and shipped end to end.
- Built with agentic AI as my delivery method — delivered end to end as a single analyst: design, build, and shipping of production tooling.
- Performance analytics: a percentile-based pacing metric designed to stay comparable across workloads with very different volumes and difficulty, combined with outcomes into a single performance index used in operational reporting.
- Progressed from data intern to Data & Process Analyst within the year, moving from reporting work to company-level strategic projects.
- Owned operational BI end to end — from roadmap and data model to reporting used daily by operations.
- Built everything configurable rather than hard-coded, so the tooling keeps working as workloads and staffing change.

Student Researcher — Philips

Sep 2022 – Dec 2022 · Eindhoven, Netherlands

- Researched OneBlade market penetration among students; built linear models estimating adoption of a blade-subscription service across student segments.

Data Entry — Von der Heide

Jan 2019 – Aug 2019 · Mexico City, Mexico

- Cleaned and migrated the company database to a new CRM system, safeguarding data integrity throughout the transfer.

Selected Projects

Market-Gap Analysis: Online-Booking Adoption in Mexico City

- End-to-end data pipeline measuring online-booking adoption across 10,605 businesses: 722 structured API queries, deduplication, two independent booking detectors, and public-registry enrichment. Measured 6.9% adoption; delivered a 9,878-row qualified dataset (89% with direct contact details) as a workbook and dashboard.

Weather Prediction-Market Research

2026 · Python, probability calibration, market microstructure

- Tested whether prediction markets price official weather observations efficiently: implied-probability extraction from order books, no-arbitrage coherence checks, repricing-latency measurement. Documented an honest null result.

Citania — Booking & Payments Platform

2025–2026 · TypeScript, PostgreSQL, React Native

- Solo-built multi-tenant booking and payments SaaS: 100+ integration tests, database-level slot exclusivity, two-way Google Calendar sync.

Football Player Value Modelling

2024 · Python, statistical modelling

- Predicted market values on a multi-year, multi-competition dataset compiled myself.

Education

MSc Data Science & Society (Business Track) — Tilburg University

2023 – 2024

BSc Economics — Tilburg University

2020 – 2023
