Rentman — Recruitment

Re: AI Engineer Trainee

Tilburg, 7 September 2026

I applied for the AI Engineer Trainee role. The honest pitch: I have been building with AI daily for a year — a production booking SaaS with an AI receptionist I built alone (TypeScript/React/Node, 294 tests), and an ML platform that values 23,353 football players with calibrated, forward-tested probabilities. What I want from a traineeship is what solo building cannot give me: engineering craft in a team that reviews my code.

Rentman's domain — resource planning for events — is operational scheduling at its core, and my professional year at Netvice was spent on exactly that class of problem: forecasting workload and turning it into staffing decisions. AI applied to planning is the overlap of everything I do.

Everything I mention is live and clickable at franciscorau.com. Available immediately, based in Tilburg.
