DSV — Recruitment

Re: Business Analyst Transport Solutions (120234)

Tilburg, 10 August 2026

I'm applying for the Business Analyst role in Transport Solutions. At Netvice, a Tilburg operations company, I built the reporting environment end to end: KPI definitions, Excel and dashboard reporting used daily by operations teams, and a forecasting model that turns planned volumes into exact capacity needs on any future day. Understanding how an operational process really runs, then building the reports that make it steerable — that is the job I have already been doing.

Logistics is a domain I would be new to, and I won't pretend otherwise — but operational analytics transfers: volumes, capacity, utilisation, exception monitoring. My economics background (BSc) plus data science (MSc) is built for exactly this translation between process and number.

Practical notes, honestly stated: one year of professional experience; working language English, Dutch at A2 and improving; kennismigrant-eligible profile — DSV's Dutch entities are recognised sponsors. Venlo is reachable from Tilburg by direct train.

Everything I describe is live and clickable at franciscorau.com. I'd gladly walk through the reporting suite in a conversation.
