Flowserve — Recruitment

Re: Business Analyst — Etten-Leur

Tilburg, 10 August 2026

Your ad asks for concrete work experience creating dashboards and overviews — that is exactly what I spent the last year doing. At Netvice, a Tilburg operations company, I built the reporting environment end to end: KPI definitions, real-time dashboards wired to live operational data, agent day reports, and a forecasting model that plans capacity 500+ days ahead. It was adopted on the floor and ran daily.

On tools, honestly: I query and model data in PostgreSQL, analyse in Python and Excel, and build dashboards in code (React/TypeScript) rather than Power BI — the underlying craft of data modelling, KPI design and visual clarity transfers directly, and I pick up new tools quickly. An industrial manufacturing environment would be new domain for me; my economics background and a year of operations analytics are the bridge.

Practical notes: I live in Tilburg — Etten-Leur is twenty minutes away. My working language is English (Dutch at A2, actively improving). I hold a kennismigrant-eligible profile and Flowserve B.V. is a recognised sponsor. One year of professional experience, stated plainly — what I can show for it is live at franciscorau.com.

I'd gladly demonstrate the dashboard suite and forecasting model in a conversation, on site or online.
